

PLD-212 Smoke Leak Detector

PLD-212 is a smoke leak detection machine, an indispensable tool for quickly and efficiently identifying and solving leakage issues in ducts and pipelines. Due to its simple operating principle and compact design, it can be used in automobiles as well as motorcycles, snowmobiles, ATVs, trucks, buses, etc.

Features

A. Transport handle	B. Pressure gauge
C. Flow meter	D. Smoke mode indicator
E. Flow adjustment knob	F. Smoke mode switch
G. Power On/Off indicator	H. Power socket: red to +, black to -
I. Smoke outlet	J. Oil filling port
K. Oil level window	

Accessories

- Power cord
- Smoke outlet hose
- Standard adapter cone
- Special oil for testing
- Rubber plugs
- Special connector for EVAP system
- Special tool for removing valves (EVAP system)
- Inflatable duct adapter

Specifications

- Operating voltage: 12 V DC
- Built-in air pump
- Overheat and freeze protection
- Equipment with pressure gauge
- Built-in airflow meter
- Output pressure: 13-16 PSI (Turbo version)
- Output pressure: 2.5 - 4 KPa (EVAP version)
